

**Field day  
20th March**

# Forestry harvesting field day

**As a forest owner or harvesting contractor, get a better understanding of harvesting your forestry block; including managing environmental impacts.**

The field day will cover key topics such as best management practices and alternative harvesting methods. The field day will be delivered to groups of small-scale forest owners in the Auckland/Northland regions. This includes forest owners who are not forestry professionals, those who own a forest that isn't managed by a forestry company or those who have responsibility for harvesting plantation forestry but don't know where to start.

**Designed and led by Perrin Ag and the Auckland Forestry Liaison Group on behalf of Auckland Council (Healthy Waters). Register your interest at [consult@perrinag.net.nz](mailto:consult@perrinag.net.nz)**

## What to bring?

Sturdy footwear, wet weather gear and water. We will be observing operations from a safe distance outside the work site, however if you own a hard hat and Hi Vis it is encouraged that you bring them.

## Location and Date

Rayonier Riverhead Forest – details to come.

20 March 2024 – 10 am to 1pm

## Costs

Costs are covered by the Healthy Waters Wai Ora Partnerships team at Auckland Council. Lunch provided.

## What's in it for you?

- Understand the environmental impact of different management practices
- Learn different ways to manage sediment and forestry slash
- Understand what Auckland Council are looking for on harvesting sites
- See alternative harvesting and engineering methods with specific areas of challenge
- Meet and discuss with others learning about forestry harvesting
